That's No Way to Run a Country Bob Myers 2019-11-09 A critical look at India today and the challenges it faces. We take a pessimistic viewpoint of India's future—one shared by many leading thinkers wiser than ourselves. We see India's weaknesses as being far too deep-rooted, and intertwined, to allow of easy solution. To make this point, this excerpt from the book examines three areas in modern India which exhibit serious dysfunction. We take no particular pleasure in reciting all these problems; we present them as a way to demonstrate clearly the existence of the dysfunction and its nature. We enumerate specific examples of dysfunction in each area in detail, and discuss the reasons for the dysfunction and the prospects, or lack thereof, for dealing with it.

How Think Tanks Shape Social Development Policies James G. McGann 2014-05-27 Across the globe, there are more than four thousand policy institutes, or think tanks, that research or advocate for economic and social development. Yet the relationship between these organizations and the policies they influence is not well understood. How Think Tanks Shape Social Development Policies examines case studies drawn from a range of political and economic systems worldwide to provide a detailed understanding of how think tanks can have an impact on issues such as education policy, infrastructure, environment and sustainable development, economic reform, poverty alleviation, agricultural and land development, and social policy. Each chapter provides an overview of the approaches and organizational structures of specific think tanks, as well as the political, economic, and social opportunities and the challenges of the environments in which they operate. The contributors study the stages of innovative think-tank-aided strategies implemented in highly industrialized world powers like the United States and Russia, emerging countries such as China, India, Brazil, and South Korea, and developing nations that include Ethiopia, Kenya, and Tanzania. Accompanied by an extensive introduction to contextualize the history and theory of policy institutes, this comprehensive comparison of policy success stories will be instructive and transferable to other think tanks around the globe.

India-Pakistan Trade Normalisation Nisha Taneja 2016-12-08

This book explores the unfinished India–Pakistan Trade normalisation agenda (building upon the themes covered in the book “India-Pakistan Trade: Strengthening Economic Relations” published by Springer in 2014) and discusses the steps that must be undertaken in order to move the bilateral engagement forward. Given the commencement of bilateral state-level talks and the Indian government’s emphasis on South Asian integration, it adds impetus to the trade liberalisation process, while also providing essential recommendations for policymakers in both countries. The unfinished agenda faces obstacles such as the list of items for which export from India to Pakistan continues to be restricted; lack of land borders and seamless cross-border transport services, which hampers the realisation of trade potential; negative reporting in the media, which influences traders’ perceptions; and the continued occurrence of informal trade resulting from inadequacies of formal trade relations. The book examines various sectors, including the agricultural, textiles, automotive and pharmaceutical industries, given their predominance on the list of restricted items for bilateral trade. It

also covers studies on unconventional and under-researched themes concerning informal trade, informational barriers to India–Pakistan trade, and opening new land borders for trade – all of which can play a facilitating role in realizing the untapped trade potential between India and Pakistan. The book also includes the second round of the India–Pakistan trade perception survey, which identifies impediments to India–Pakistan bilateral trade and assesses the change in traders' perceptions since the first round of the survey, which was published in 2014.
