A Guide to the Reptiles of Southern Africa Graham Alexander 2013-03-13 Southern Africa is home to a remarkably diverse and rich reptile fauna, which is presented in this book in a lively and accessible way. A Guide to the Reptiles of Southern Africa introduces the 517 species currently described in the region and presents interesting insight on reptile identification and diversity, distribution patterns, and biology and behaviour. It also offers tips on finding and observing reptiles, as well as unravelling the facts and fallacies of snakebite. Southern African reptiles fall into three main groups (orders): snakes and lizards, crocodiles and shelled reptiles, and each group comprises in turn a number of related families and sub-groups, which form the basic structure of the book. The reptiles are discussed within their relevant groups according to appearance, biology, reproduction, distribution and conservation status. Informative panels with simple icons provide key information on distribution, typical habitat and period of activity, and a wealth of full-colour photographs brings the subject matter vividly to life.

Shadow and Act Ralph Ellison 2011-06-01 With the same intellectual incisiveness and supple, stylish prose he brought to his classic novel Invisible Man, Ralph Ellison examines his antecedents and in so doing illuminates the literature, music, and culture of both black and white America. His range is virtuosic, encompassing Mark Twain and Richard Wright, Mahalia Jackson and Charlie Parker, The Birth of a Nation and the Dante-esque landscape of Harlem?"the scene and symbol of the Negro's perpetual alienation in the land of his birth." Throughout, he gives us what amounts to an episodic

autobiography that traces his formation as a writer as well as the genesis of Invisible Man. On every page, Ellison reveals his idiosyncratic and often contrarian brilliance, his insistence on refuting both black and white stereotypes of what an African American writer should say or be. The result is a book that continues to instruct, delight, and occasionally outrage readers thirty years after it was first published.

Shadows of Power Jean Hillier 2003-09-02 Shadows of Power examines public policy and in particular, the communicative processes of policy and decision-making. It explore the important who, how and why issues of policy decisions. Who really takes the decisions? How are they arrived at and why were such processes used? What relations of power may be revealed between the various participants? Using stories from planning practices, this book shows that local planning decisions, particularly those which involve consideration of issues of 'public space' cannot be understood separately from the socially constructed, subjective territorial identities, meanings and values of the local people and the planners concerned. Nor can it be fully represented as a linear planning process concentrating on traditional planning policy-making and decision-making ideas of survey analysis-plan or officer recommendation-council decision-implementation. Such notions assume that policy-and decision-making proceed in a relatively technocratic and value neutral, unidirectional, step-wise process towards a finite end point. In this book Jean Hillier explores ways in which different values and mind-sets may affect planning outcomes and relate to systemic power structures. By unpacking these and bring them together as influences on participants' communication, she reveals influences at work in decision-making processes that were previously invisible. If planning theory is to be of real use to practitioners, it needs to address practice as it is actually encountered in the worlds of planning officers and elected representatives. Hillier shed light on the shadows so that practitioners may be better able to understand the circumstances in which they find themselves and act more effectively in what is in reality a messy, highly politicised decision-making process.

The Chameleon's Shadow Minette Walters 2011-05-13 A compelling look into damaged minds, The Chameleon's Shadow is a psychological thriller from crime queen Minette Walters. When Lieutenant Charles Acland is flown home from Iraq with serious head injuries, he faces not only permanent disfigurement but also an apparent change to his previously outgoing personality. Crippled by migraines, and suspicious of his psychiatrist, he begins to display sporadic bouts of aggression, particularly against women, especially his ex-fiancee who seems unable to accept that the relationship is over. After his injuries prevent his return to the army, he cuts all ties with his former life and moves to London. Alone and unmonitored, he sinks into a private world of guilt and paranoid distrust . . . until a customer annoys him in a Bermondsey pub and he attracts the attention of local police investigating three murders which appear to have been motivated by extreme rage . . . Under suspicion, Acland is forced to confront the real issues behind his isolation. How much control does he have over the dark side of his personality? Do his migraines contribute to his rages? Has he always been the duplicitous chameleon that his ex-fiancee claims? And why – if he hates women – does he look to a woman for help?

A Fine Gray Rain: In the Shadow of Mount Pinatubo Robert Reynolds 2016-12-26 In 1991, Mount Pinatubo awoke after 500-yrs dormancy. Nearby, America's Clark Air Base evacuated military personnel and dependents to Subic Bay Navy Base. One thousand Air Force and civilians remained to safeguard Clark AB. A series of violent volcanic eruptions hurled ash, rock and gas into the sky. At the same time Typhoon Yunya blew in off the Pacific and earthquakes repeatedly rattled the Philippines countryside. As the rain-laden ash fell back to earth, aircraft hangars, warehouses, homes and buildings crashed to the ground as muddy ash covered the terrain. When the eruptions let up, military officials began evacuating tens of thousands from the country while those deemed mission-essential began salvage operations. This is a true account of this historic event from the perspective of a small group of civilians who were present throughout.

Betraysals & Broken Promises Takari Hunter 2020-03-31 Being a chameleon demoness already made things tricky, but did it need to be this difficult? All Dahlia wanted was her freedom, but first, she needed to buy out of her promised bonding, a promise that was made for her before she was even born. Almost a century of trying had taken its toll, and she'd done things she wasn't proud of. Lost parts of herself along the way and flirted with the darkness inside her. And it flirted back. She told herself it would all be worth it in the end, but before she won that battle, everything in her life systematically blew up in her face—one piece at a time. Blaming it all on the beautiful, egotistical vampire who showed up in her life would be easy, but it started long before he arrived. With his help, she might succeed, but Dahlia wasn't sure she could trust an outsider—not even one sent by Lucifer himself. Dahlia was standing on the brink of having everything she'd ever dreamed of, but she also risked losing it all. Was her freedom really worth the cost?

1668 Peter Sahlins 2017-11-17 Peter Sahlins's brilliant new book reveals the remarkable and understudied "animal moment" in and around 1668 in which authors (including La Fontaine, whose Fables appeared in that year), anatomists, painters, sculptors, and especially the young Louis XIV turned their attention to nonhuman beings. At the center of the Year of the Animal was the Royal Menagerie in the gardens of Versailles, dominated by exotic and graceful birds. In the remarkable unfolding of his original and sophisticated argument, Sahlins shows how the animal bodies of the menagerie and others (such as the dogs and lambs of the first xenotransfusion experiments) were critical to a dramatic rethinking of governance, nature, and the human. The animals of 1668 helped to shift an entire worldview in France — what Sahlins calls Renaissance humanimalism — toward more modern expressions of Classical naturalism and mechanism. In the wake of 1668 came the debasement of animals and the strengthening of human animality, including in Descartes's animal-machine, highly contested during the Year of the Animal. At the same time, Louis XIV

and his intellectual servants used the animals of Versailles to develop and then to transform the symbolic language of French absolutism. Louis XIV came to adopt a model of sovereignty after 1668 where his absolute authority is represented in manifold ways with the bodies of animals and justified by the bestial nature of his human subjects. *1668: The Year of the Animal in France* explores and reproduces the king's animal collections — in printed text, weaving, poetry, and engraving, all seen from a unique interdisciplinary perspective. Sahlins brings the animals of 1668 together and to life as he observes them critically in their native habitats — within the animal palace itself by Louis Le Vau, the paintings and tapestries of Charles Le Brun, the garden installations of André Le Nôtre, the literary work of Charles Perrault and the natural history of his brother Claude, the poetry of Madeleine de Scudéry, the philosophy of René Descartes, the engravings of Sébastien Leclerc, the trans_fusion experiments of Jean Denis, and others. The author joins the non_human and human agents of 1668 — panthers and painters, swans and scientists, weasels and weavers — in a learned and sophisticated treatment that will engage scholars and students of early modern France and Europe and readers broadly interested in the subject of animals in human history.

Animal Colour Changes and Their Neurohumours George Howard Parker 2012-03-29 Originally published in 1948, this book covers the main papers published on animal colour changes between 1910 and 1943. It is a continuation of the work of van Rynberk and Fuchs, who produced important reviews of the topic in 1906 and 1914 respectively. During the period covered, the topic underwent a considerable growth in interest. This is reflected in a bibliographical list of over 1200 items at the end of the text, over twice the number given by Fuchs for the whole period up to 1914. Containing rigorous analysis and illustrations throughout, this book will be of value to anyone with an interest in chromatophores and the history of science.
